

Fall prevention system for windows **FAS** 

Because of its adjustable width, the FAS fall prevention system for windows from INNOTECH can be used universally and is therefore very well suited for securing appropriately while cleaning open windows, as per legal requirements. Because of its low self-weight, the FAS is quick and easy to attach and remove.

-  revolutionary safety system for windows
-  optimum for cleaning tasks
-  can be used universally due to its telescopic system
-  collective side protection – no safety harness required
-  certification to the latest state of the art:

EN13374:2013
